DETAILED ACTION

1. This action is responsive to communications: Amendment A filed 01/08/2004 to the original application filed 12/27/1999.

Please note that the examiner formerly in charge of examining this application, Charles Bieneman, is no longer employed at the USPTO. Maikhanh Nguyen is now in charge of examining this application. Please update future correspondence accordingly.

2. Claims 1-6, 8-10, 12-29, 31-33, 35-38, 40 and 41 are currently pending in this application. Claims 7, 11, 30, 34 and 39 have been cancelled. Claims 1, 8, 14, 24, 31, 37-38 and 40-41 are independent claims.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6, 24-29 and 38 drawn to a document processor which displays and prints in a predetermined format a plurality of document data input, classified in class 715, subclass 526.

II. Claims 8-10, 12-13, 31-33, 35-36 and 40 drawn to a document classification device which classifies documents based on content, classified in class 707, subclass 4.

III. Claims 14-23, 37 and 41 drawn to a document classification device which classifies document clusters, classified in class 707, subclass 7.

4. The inventions are distinct, each from each other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as outputting all or part of the document data work-processed by the work processing; invention II has separate utility such as correcting document characteristic vectors stored in the document characteristic vector memory; and invention III classifying a document data into categories according to specific topics and meanings. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
